If you are working on a salary your services are your capital, and as the years go by you are using up your capital. Are you creating a fund to offset this loss? If not, you are becoming poorer every day. Each year's labor should represent a substantial sum in the bank. You don't want old age to find you with no money and impaired faculties.

Start a Savings Account at once if you have not already done so. The earlier you begin to save for old age the less you will need to lay aside, because the 3% interest we pay helps quite a lot.
